INTERNATIONAL SCHOOL FOR CULINARY ARTS & HOTEL MANAGEMENT

The International School for Culinary Arts and Hotel Management is a world-class training center where dedication and close ties to the hospitality industry are the hallmarks of teaching and learning. It is owned, developed and managed by men and women who are top international hotel professionals. Together they bring to the classroom expertise and business savvy that will provide students with comprehensive theoretical knowledge and practical hands-on experience necessary to prepare for a rewarding career in the dynamic and exciting industries of culinary and pastry arts and hotel management.

Pastry and Bakery Arts and Kitchen Management

One-year course for Pastry and Bakery Arts and Kitchen Management: Our faculty, composed of former 5 star Hotel Pastry Chefs, train students in both theoretical knowledge and practical skills.

Curriculum Objective:

This one-year intensive course is developed based on today's international pastry and bakery trends, incorporated into the traditional European dual training approach. The course shall give the student a solid knowledge in pastry and bakery arts, so that the student can successfully join a hotel pastry and bakery operation here in the Philippines or abroad.

Theoretical Curriculum

In the theoretical classes, students are exposed to a curriculum, which make them understand the flow and management of an actual pastry and bakery operation from planning to execution and marketing of the product.

Great emphasis is given in the teaching of traditional and proven pastry and bakery trends as well as new methods and techniques for restaurants, banquets, pastry and bakeshop use.

Students are also trained in the financial management and control functions of a pastry / bakery and kitchen operation, from budgeting, to purchasing, receiving and storeroom operations and food processing controls.

Aside from these, emphasis is also given to the administrative management of a pastry / bakery and kitchen operation, which includes human resources management, marketing and sales, planning of promotions, festivals and creating banquet and restaurant menus.

In this course, students are exposed to basic kitchen knowledge, product knowledge, cooking methods and techniques, as well as menu knowledge. Classes in basic service knowledge, service rules and regulations, as well as beverage knowledge, are also included in the curriculum.

Practical

The practical sessions start with a one-month introduction on the fundamentals of pastry arts. In this introduction, all the basic pastry / bakery techniques and pastry / bakery methods, as well as pastry / bakery organization and equipment knowledge are taught.

For the rest of the year, students are exposed in the production of international pastry and bakery items for hotels, restaurants, banquet and cake shop operations.

The course strongly emphasizes the production of basic pastry concoctions such as different types of dough, masses, creams, sauces, mousses, hot and cold puddings, cakes, frozen deserts, ice creams and cold desserts. Students also have the chance to work with chocolate and marzipan, French pastries, and international desserts. Furthermore, the students are exposed to modern dessert presentations. In baking the students are exposed in the formulation of bread recipes, the production of sour dough breads, milk dough breads, water dough breads, sweet breads and international specialty breads.

To enhance the student's creativity and business sense, the school organizes periodic pastry and bread promotions, executed by the students.

The strength of the practical course is in the simulated working environment of an actual pastry / bakery operation. All practical classes produce the dessert items that the students in theory have for lunch. This approach is very beneficial to students taking this course, as their skills are strongly developed during the school year. This exposure in volume production will be a clear advantage to the students when joining the industry.
